shore."

The real heroines of every day are in our homes. Frequently, however, it is a mistaken and useless heroism.

Women seem to listen to every call of duty except the supreme one that tells them to guard their health. How much harder the daily tasks become when some derangement of the female organs makes every movement painful and keeps the nervous system unstrung? Irritability takes the place of happiness and amiability; and weakness and suffering takes the place of health and strength. As long as they can drag themselves around, women continue to work and perform their household duties. They have been led to believe that suffering is necessary because they are women. What a mistake!

The use of Lydia E. Pinkham's Vegetable Compound will banish pain and restore happiness. Don't resort to strong stimulants or narcotics when this great strengthening, healing remedy for women is always within reach.

FREE MEDICAL ADVICE TO WOMEN. If there is anything in your case about which you would like special advice, write freely to Mrs. Pinkham. No man will see your letter. She can surely help you, for no person in America has such a wide experience in treating female ills as she has had. She has helped hundreds of thousands of women back to health. Her address is Lynn, Mass., and her advice is free. You are very foolish if you do not accept her kind invitation.

For proof read the symptoms, suffering and cure recited in the following letters:

"DEAR MRS. PINKHAM: —I wish to express to you the great benefit I have derived from your advice and the use of Lydia E. Pinkham's Vegetable Compound. My trouble was female weakness in its worst form and I was in a very bad condition. I could not perform my household duties, my back ached, I was extremely nervous, and I could not eat or sleep, and the bearing-down pains were terrible. My husband spent hundreds of dollars to get me well, and all the medicine that the doctors prescribed failed to do me any good; I resorted to an operation which the physician said was necessary to restore me to health, but I suffered more after it than I did before; I had hemorrhages of the womb that nothing could seem to stop.

"I noticed one of your advertisements and wrote you for advice, I re-

ceived your reply and carefully followed all instructions. I immediately began to get stronger, and in two weeks was about the house. I took eight bottles of Lydia E. Pinkham's Vegetable Compound and continued following your advice, and to-day I am a well woman. Your remedies and help are a Golsend to suffering women, and I cannot find words to thank you for what you have done for me." - Mrs. Lottie V. Naylor, 1328 N. J. Ave., N.W., Washington, D. C.

"DEAR MRS. PINKHAM :- I write to tell you what Lydia E. Pinkham's Vegetable Compound has done for me.

"I was suffering with falling of the words and could hardly drag about, but after taking five bottles of Lydia E. Pinkham's Vegetable Compound I was completely cured. I am now a well woman and able to do all

"I think your medicine one of the best remedies in the world." — Mrs. J. M. Lzz, 141 Lyndal St., Newcastle, Pa. "DEAR MRS. PINKHAM: - Lydia E. Pinkham's Vege's ble Compound has done a great deal for me. I suffered so much from falling of the womb and all the troubles connected with it. I doctored for years with

doctors and other remedies but received only temporary relief feeling better. My husband said that I should keep right on taking it as long as it gave me relief from my suffering, as I could not expect to be cured by one or two bottles. I did so and am now able to be on my feet and work hard all day, and go to bed and rest at night. Thanks to your Vegetable Compound I am certainly grateful for the relief it gave me. It is the mother's great friend. I would not be without it in my house, for when I feel tired or out of sorts I take a few doses and feel all right.

"I would recommend your medicine to all tired mothers, and especially

to those suffering as I was." - MRS. R. F. CHAMBERS, Bennet, Neb. \$5000 FORFEIT if we cannot forthwith produce the original letters and signatures of above testimonials, which will prove their absolute genuineness.

AGRICULTURAL.

Poultry on Small Areas. Several of the poultry papers are printing articles showing that it is possible for one to make a good living from poultry raised on a small area. It is noticed that receipts are based on great institutions where their fathers prices for eggs, ranging from 25 cents a dozen in the summer to 60 cents a The principal makes himself responsidozen in the winter. It is unfair to print articles of this kind, for there and at the close of each day's business are very few places where 60 cents a deposits the daily receipt in one of dozen can be had for eggs. If one can average half that price the year around | ing institutions,-From "A School Savhe is doing remarkably well. On the | ings Bank" in the September St. Nichother hand, there is no doubt but what olas. poultry can be profitably raised on a small area, though there is some question if one could obtain a living for an entire family by such a plan, assuming that both eggs and carcasses were sold to consumers at average retail prices. Under the best possible conditions it is unusual to realize more than one dollar per head profit per year on an average, so that the receipts can be figured out readily. True, the farmer who is in a position to raise his own feed for poultry will average a greater profit per hen, provided he will give them the necessary care for best results. There is money in raising poultry, but there are no fortunes in the work, even under the most unusual conditions.—Indianapolis News.

Inserted pieces of pleated white tulle or chiffon make a pretty and attractive trimming that is not seen so often as to make it undesirably common.

The Reading Dairyman. I have seen one dairyman with a

beautiful home, large and well-ventilated stables, all the product of a herd of milch cows, and another farmer with the same old house he built ten years before, dilapidated stables, gates broken, fences down, all the product of another herd of cows, equal in number to the first. Why this difference with same conditions? asks E. A. McDonald, Washington Dairy and Food Commissioner.

If you go into the home of the first class of men you will find agricultural papers; you will find a reader; a man who has a thinker and is using it. He may not be a graduate of any agricultural college, but he is a self-educated man, who received a large part of his education from the agricultural papers. How much more advanced he would have been if he had learned the rudiments at the agricultural college. But the greater honor is due to self-education than to a college-educated man. Still, if progress was to depend on self-education we would resemble the ant.

I am a firm believer that the duty of every State is to place a premium on agricultural pursuits. The most important branch of agriculture is dairy. ing. The growth of cereals depends on dairying to return its elements to the soil of which the soil has been robbed by their growth. Dairying enriches the soil, while growth of cereals impoverishes it. Therefore, no branch of agriculture should be fostered and encouraged as much as the dairying industry.-Tennessee Farmer.

For the Winter Diet.

Through the summer the diet of the hens has been somewhat restricted, grain and especially corn having proved almost too fattening and heating for the weather; but with the first indications of the bleak days the poultry should have their full winter "Poor fellow! His doctor tells him diet. This should be given for the the only thing that will cure him is a purpose of increasing the general health and strength of the hens and course of mud baths, and he can't afthen for eggs. Hens which do not 'But surely he can go into politics have splendld health and strength canand let the mud come to him."-Philanot prove good layers of eggs. The two go together. You may feed hens on stimulating foods so they will lay a few extra eggs, but in a short time they will give out and prove worthless "Do you think it's going to rain?" The first thing should be to aim for a good, all-round diet that will make the "Oh, I'm sure it's not," he replied, birds healthy and strong. Grain, corn, "Then I'll take my umbrella," she scraps of meat, bread, and such table answered, with decision .-- Chicago leavings should be fed to them liberally. Do not forget the seeds, which in the fall of the year can be collected "The American Husband" is a muchin considerable quantities. Hens like written and talked-about individual; the seeds of flowers, vegetables and it is unlikely that he will ever cease weeds. They enjoy eating them out to be a subject of interest, not only of the pods, and the plants where as a future possibility, but also as an possible should be cut down and a huge blowing pipe, actual reality. It is not often, howthrown into the chicken yard. The ever that he has the good fortune to work of collecting them will do the hear, in the latter capacity, so impar-

tial a critic as Gertrude Atherton, who, Grain and corn are essential now. in Ainslee's for September, has made You cannot neglect these without endangering the health of the birds. and defects. American husbands and Whether spring chickens or laying wives should read it, and take it to hens, they should have their daily grain ration. Bran cooked or scalded is an excellent food for them, and fed hot or cool mornings it proves of great ness after first day's use of Dr. Kline's Great Nerve Restorer. \$2trial bottle and treatisefree benefit. Overfeeding, of course, must be avoided. Too much corn and grains will make the hens fat and lazy, and It must be fine to be so rich that you cause indigestion, which will ruin all the good obtained. To avoid laziness make the hens work part of the day If you can use the best big 500-pound steel for their food. Turn them loose in some straw with the grain scattered have it placed in your own home on three months' free trial, just cut this notice out and send it to SEARS, ROBBUCK & Co., Chiaround in it, and then make them and send it to SEARS, ROEBUCK & Co., Chicago, and you will receive free by return mail a big picture of the steel range and many other cooking and heating stoves; you will also receive the most wonderful \$1.00 steel range offer, an offer that places the best steel range or heating stove in the home of any family; such an offer that no family in the land, no matter what their circumstances may be, or how small their income, need be without the best cooking or heating stove made. scratch for it. There are many ways to make the laying hens keep their health even when fed dally on a full,

well-rounded dlet. Green bones carefully ground, and oyster and clam shells pounded very fine, are all good in their way, and they do help to increase the egg output; but not unless the rest of the diet is good describes, of course, as one may gainand wholesome. It is folly to think that the ground bone will make more eggs when the hens are barely getting enough to cat to keep body and soul sary as mumps or measles are to together. There must be a surplus of childhood. As is to be expected, Mr. food in the system, and then something | Bell handles his subject with the ease fed to stimulate egg-laying may divert and grace of a master. a part of this surplus to the hen's proper function instead of letting it all go to fat. Care must be taken that the hens do not get fat; any such tendency should be checked, for fat hens do not law many eggs. Strong, active henz, well fed and contented, do .-Annie C. Webster, in American Culiivator.

Miss Muriel Armitage, 30 Greenwood we, Detroit, Mich., District Organizer I the Royal Templars of Temperance, a a recent letter, says: "I think that a woman naturally

shrinks from making her troubles public, but restored leadth has meant so much to me that I feel for the sake of other suffering women it is my duty to tell what Peruna has done for me. "I suffered for five years with uterine irregularities, which brought on hysteria and made me a physical wreck. I tried doctors from the different schools of medicine, but without any perceptible change in my condition. In, my despair I called on an old nurse, who advised me to try Peruna, and promised good results if I would persist and take it regularly. I thought this was the least I could do, and procured a bottle. I knew as soon as I began taking it that it was affecting me differently from anything I had used before, and so I kept on taking it. I kept this up for six months, and steadily gained strength and health, and when I had, used fifteen bottles I considered myself entirely cured. I am a grateful, happy woman to-day."—Miss Muriel Armitage.
